

Scenario: [Existing experience through a product or service]	 Entice The user discovers your Tableau dashboard	 Enter The user opens the dashboard for the first time	 Engage The user interacts with the maps, filters and charts to explore data.	 Exit The user finishes their session, having gained insight into heritage site distributions or trends.	 Extend The user shares the link, uses the findings for research or returns later for updated data.
 Experience steps What does the person (or people) at the center of this scenario typically experience in each step?	Clicks on the interactive map Filters sites by "Cultural" type User discovers the dashboard via LinkedIn or portfolio	Opens the dashboard in a web browser Scans the overall dashboard layout for primary navigation cues	Interacts with the map, filters, and charts to explore data Interacts with the map, filters and charts Performs comparative analysis across different continents Toggle between different dashboard tabs to view various metrics	Finishes the sessions after gaining insights Synthesize visual findings into a personal understanding	Shares the link or uses findings for research/travel Uses findings for research or travel planning Applies trend data to academic projects
 Interactions What interactions do they have at each step along the way? • People: Who do they see or talk to? • Place: Where are they? • Things: What digital touchpoints or physical objects do they use?	Uses a mouse to hover over site markers Interacts with the Tableau filters panel Clicks on the link, views the dashboard landing page	Navigates through the initial dashboard layout Observes the global map view to identify focus areas	Uses mouse to hover, Adjusts filters, zooms on map Scans specific time periods to visualize site inception growth Compares regional data side-by-side using filter interactions	Closes browser or leaves a dashboard snapshot Reviews final summary dashboard widgets	Shares on social media, refers to the dashboard later for updates Bookmarks the URL for future reference Harvests the resource in an academic report or article
 Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Wants to see which country has the most endangered sites Seeks to explore historical or prehistoric heritage site distribution	Wants to understand the dashboard's scope Establishes context regarding the data's source and currency	Answering specific questions like "What region has the most natural sites?" Validates geographical density of endangered sites Seeks corroborative evidence via site age and conservation status	Confident that the research question was answered Confirms the data matches their initial inquiry	Wants to keep informed about updates, UNESCO data Wants to track ongoing UNESCO policy impacts
 Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Dashboard loads quickly Clear color coding makes data easy to understand Quick access to the link, professional presentation	Intuitive initial view, clean dashboard design Visually appealing color palette choices	Dashboard loads quickly, Clear color coding High responsiveness during data filtering Intuitive series, allowing cross-map zoom	Successfully found specific heritage trends Clear and professional visualization summaries	Easy-to-share URL structure High utility for ongoing academic research High degree of trust in the dashboard's accuracy
 Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Partial view of site presented, high bounce rate if loading page is unclear Initial slow page load, Unclear landing page	Overwhelming number of filters on the first view Initial confusion regarding filter functionality	Filters stency with large datasets, Complex charts Map clusters, occasionally hide smaller site details Unintended filter reset upon page refresh	Difficulty exporting raw findings Lack of a "Print to PDF" summary option	No notification system for data updates Static data limited by manual updates Lack of a clear version history for data updates
 Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Add "Read More" tooltips for site details Implement a search bar for faster site navigation Optimize loading page for faster loading, Add a clear project title	Add a simple "New to use" guide, Group filters logically Simplify filters labels for faster comprehension	Add "Read More" tooltips, Implement a search bar Add "Read More" tooltips for deeper site details	Add a "Download Report" or "Export Data" button Enable a one-click summary dashboard export	Add a "Subscribe" or "Follow for Updates" feature Integrate an automated data refresh API Include an "About this data" section with update frequency
