

Project Design Phase-II

Data Flow Diagram & User Stories

Date	29 June 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

Data Pipeline Steps

1. Researcher accesses the Tableau Dashboard to initiate data analysis.
2. The system connects to the external UNESCO API and public CSV datasets.
3. Raw data is loaded into Tableau Prep for cleaning, filtering, and preparation.
4. Prepared data is stored in a dedicated Heritage Database.
5. Tableau connects to the database to generate the final visualizations.

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Researcher	Data Visualization	USN-1	As a researcher, I can filter heritage sites by region or country.	I can see the map update based on my selected filters.	High	Sprint-1
	Analysis	USN-2	As a researcher, I can compare the conservation status of different sites.	A comparison chart displays clear status trends.	High	Sprint-1
		USN-3	As a researcher, I can export summarized site reports for my records.	The system generates a downloadable PDF report.	Medium	Sprint-2
Public User	Exploration	USN-4	As a user, I can view detailed information for a specific heritage site.	A pop-up provides descriptions and location details.	Medium	Sprint-1
Customer Care Executive	Support & FAQ	USN-5	As an executive, I can access an FAQ section regarding site preservation policies.	The FAQ section is searchable and provides accurate answers.	Medium	Sprint-2
Administrator	Data Management	USN-6	As an admin, I can upload updated UNESCO site lists to the dashboard.	The dashboard refreshes successfully with new data source.	Low	Sprint-2
